

3 Hotel Mapping Tools

Leading The Market Today

Are you concerned about the irregular content updates with suppliers, inaccurate room mappings, and duplicate property listing on your travel portal? If your answer is a resounding yes, then, you need a dedicated Hotel Mapping Tool. Let's look at the top three hotel mapping tools leading the market.

1.

Vervotech

Vervotech is an award-winning tech company leveraging the power of AI & ML to uniquely map hotel data with 99.999% accuracy and splendid coverage of 98%. Also, Vervotech has a source agnostic algorithm. An extensive network of 600+ suppliers allow Vervotech's Hotel Mapping Tool to offer you the best-opinionated hotel content in the market. The tool provides accessibility with both API and manual FTP.

3.

Mapping.Works

Mapping.Works by Gimmonix is also a fully automated cloud-based hotel mapping platform. Gimmonix has a reasonably good number of properties in its database and uses no manual labor to process that data, which puts it in the club of fully automated hotel mapping tools. Gimmonix's tool is for both suppliers and OTA's; it offers the solution with API Integration.

2.

GIATA

GIATA is a hotel mapping service provider with a significant hotel catalog and has decent coverage of inventory in the hotel mapping market. GIATA maps hotel data by creating a universal property code, which the company calls GIATA Multicode. The GIATA Multicode is transferable; the new owner can use the same code when the ownership changes. Mapping by GIATA is powered by fuzzy logic and yet to be fully automated.
