

Organizing World's Accommodation Data

Vervotech Room Mapping

Vervotech is an award-winning SaaS-based mapping solution provider. **Vervotech Room Mapping** intelligently analyzes, standardizes, and groups multiple similar rooms by different suppliers via multiple parameters like room type, room view, amenities, bed type, description, policies and 40+ attributes. This ensures the same room does not get listed on your portal twice. We deliver to our clients highly detailed information to help their customers make an informed booking decision.

Product Features

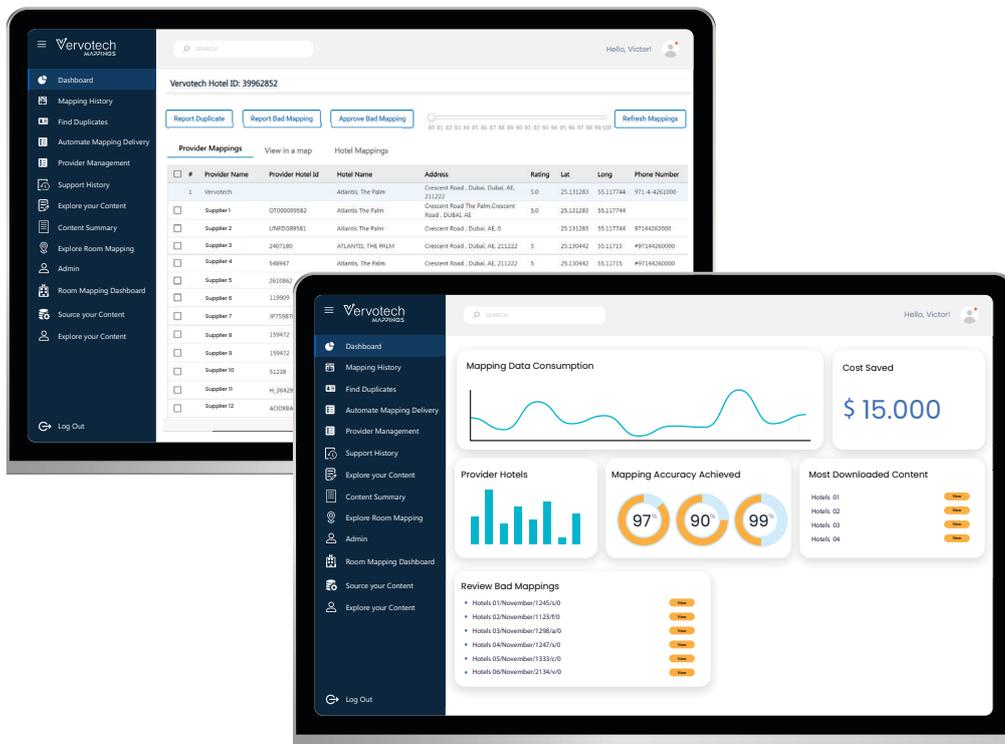

- Multilingual room mapping (New)
- Powered by AI and natural language processing
- Proven room accuracy & room coverage
- Consolidates unstructured supplier data

How Vervotech Can Benefit Your Business?

Empowered By Innovation, We Care About Our Clients' And Partners' Needs

▶ Best in Room & Rate Level Mapping

Our cutting-edge technology provides **completely mapped rooms** so that you can list and sell only the most viable rooms on your online portal.

▶ Visibility

An **intuitive** dashboard and a **self-service portal** that will provide greater control over your room content.

▶ Standardized Room Data

We help your customers make smarter booking decisions with advanced AI-based algorithms that consolidates unstructured supplier data into structured data with the **highest room content accuracy of 99.99%**.

▶ Master Room Content

Provide your top-selling hotel data and we will **analyze, curate, and deliver standardized room data**, enabling your business to grow efficiently.

▶ Seamless Integration

Integrate your platform with Vervotech Mapping API seamlessly for quicker room content access and **reduced go-to-market time**.

▶ Multilingual Room Content

Expand your foothold in the foreign market with our multilingual room content. We help you **deliver your content in your preferred language** that your customers understand.
