

DM Vervotech DualMap

Ensure Absolute Mapping Confidence in Your Hotel Bookings

Meet Vervotech DualMap- Your Mapping Companion

Vervotech DualMap is designed for travel agencies like yours, who already use third-party or in-house mapping solutions. Our innovative product complements your existing mappings by re-verifying them in real-time through our easy-to-integrate API. Think of it as an extra layer of assurance that ensures every booking is accurate and every customer is satisfied.

Real-Time Pre-Booking Verification

Instantly re-verify hotel mappings before the customer completes their booking. Catch and resolve discrepancies on the spot, providing a smooth and reliable booking experience.

Post-Booking Verification

Prefer not to interrupt the booking flow? Verify mappings immediately after a booking is made. Address any issues promptly without affecting customer satisfaction.

Customizable Discrepancy Handling

Tailor the system to respond to discrepancies based on your business needs:

Refundable Bookings Allow the booking to proceed and flag it for manual review.

Non-Refundable Bookings Pause the booking and notify your team for immediate action.

Booking Value Thresholds Set specific actions based on the booking amount.

Easy Integration

Our API is designed for simplicity. With clear documentation and dedicated support, integrating DualMap into your existing platform is straightforward and hassle-free.

How It Works

01 Integration

Incorporate the DualMap API into your booking system with our guidance.

02 Real-Time Verification

The API re-verifies hotel mappings either before checkout or immediately after booking confirmation.

03 Discrepancy Detection

If a mismatch is found, DualMap instantly flags it based on your predefined rules.

04 Automated Actions

The system executes your chosen actions, ensuring consistent and efficient handling of discrepancies.

Ready to Elevate Your Booking Accuracy?

Don't let mapping discrepancies hold your business back. Choose Vervotech DualMap to provide the seamless and reliable booking experience your customers expect.
