

Room Mapping

No more incorrect room information! Only the right ones your customers want to see.

Vervotech's **AI-powered Room Mapping tool** perfectly maps hotel rooms to deliver error-free room listings and room amenities.

- ✔ simplify travel
- ✔ make hotel content better
- ✔ enhance CX

Features our customers love

Room-level mapping

Provision of perfectly mapped room content with the help of AI to eradicate instances of incorrect listings

Rate-level mapping

Rates mentioned by different suppliers are also mapped to display the best possible rate you want to and maximise profits as a result.

Speed

Mapped room content can be delivered within 24 hours with a superfast API response time of 0.05 milliseconds

Visibility

A dedicated portal available for clients to have complete visibility of their mapped room content

Multilingual content

Availability of multilingual room content to tap into international markets

Accuracy

A staggering 95% accuracy is achieved in the mapped room content through AI

Room attributes

Provision of 10+ room attributes

API integration

Provision of real-time API integration
